Insurance, consulting, audit

Back-end and de-commissioning

Atomex exhibition is the shortest way to find new customers through direct interaction with them. The exhibition gathers the leading corporate customers of the nuclear industry as well as current and potential suppliers.

Participation in the exhibition allows you:

- to show the products and services of your organization to the target audience
- to expand the range of potential customers and clients
- to establish direct contacts at the level of decision makers on procurement
- to conduct targeted negotiations with the executives of the main customers in the nuclear industry, engineering experts and representatives of procurement departments
- to participate in workshops and training seminars "How to Become a Supplier in the Nuclear Industry"

Advantages of Participation at the Conference

Atomex conference traditionally includes panel discussions, seminars, workshops and presentations of products and technologies in the thematic groups of the exhibition.

Participation in the conference allows you:

- to participate in workshops and training seminars «How to Become a Supplier in the Nuclear Industry»
- to take part in workshops and seminars for foreign suppliers
- to get acquainted with the procurement program of corporate customers for 2018
- to obtain information on the current development trends in the procurement system of the nuclear industry
- to find out more about supplier certification and quality requirements
- to learn about design of nuclear facilities and their demands on the stages of construction and operation
- to assess opportunities for suppliers in construction and servicing of nuclear power plants in Russia
- to obtain information about financial instruments that provide support to suppliers

B2B Meetings

Specialized appointment system B2B meeting provides forum participants with an opportunity to conduct targeted negotiations with:

Representatives
of ROSATOM

Executives
of the Main Customers

Engineering
Experts

Professionals
of Procurement
Departments
